EXPERIENCE

Beamy

Sep 2022 – May 2025

Fullstack Software Engineer

📍 Paris, France

Fullstack engineer on a SaaS governance platform using a modern TypeScript stack.

- Built and maintained backend services with NestJS (TypeScript, PostgreSQL, Redis) and modern frontend features using Nuxt 3.
- Developed a web extension distributed to 100,000+ users, with strong constraints on scalability.
- Implemented Hexagonal Architecture principles across several projects to improve code decoupling and testability.
- Drove the adoption of AI-assisted development tools within the team, from early GitHub Copilot integration to migrating to newer AI-driven dev tools.
- Maintained CI/CD pipelines and deployed new services on GCP and Kubernetes clusters.

Manager.one

Jul 2019 – Aug 2022

PHP Backend Software Engineer

📍 Paris, France

Web developer on a professional online banking platform and white-label ecosystem.

- Contributed to the development of a large-scale B2B professional banking solution.
- Held full ownership of 2 white-label projects: managed direct client relationships (from requirements gathering to feedback), technical implementation, and final delivery.
- Led a team of 3 developers, conducting code reviews and mentoring on best practices.

Air France

Apr 2018 – Aug 2018

Frontend Developer Intern

Frontend development on an internal operational tool using Angular and TypeScript.

- Developed and maintained an internal web application for operational teams
- Built reusable UI components and integrated REST APIs
- Worked in a small agile team with direct stakeholder interaction

PERSONAL PROJECTS

Apartment Full Renovation

End-to-end renovation of a residential property.

- Planned and executed a complete renovation, including bathroom remodeling and electrical system upgrades.

Personal Home Server & Homelab

Self-hosted infrastructure managing home automation and private cloud services.

- Architected a home server (proxmox) hosting multiple open-source services and custom micro-apps via Docker.
- Developed several applications and workflows for private use (web scraping, automation, etc.). Including <https://cv.gab.pm>.
- Maintained the infrastructure and hosted services.

Spotify Listening History

<https://sound.kiffeur.fr>

A personal project developed to visualize Spotify listening history and real-time playback through a dynamic and immersive interface.

- Built with Nuxt 3 and integrated Spotify Web API to fetch and process real-time listening data and history.
- Experimented with modern frontend techniques to ensure smooth, high-performance visual rendering.
